RE: Business Reference

Dear Steve,

Following the successful completion of another project, we are pleased to provide the following reference.

Fayat Piling Limited ("Fayat") would not hesitate to recommend GVE Commercial Solutions Limited ("GVE"). Their experience, professional knowledge and understanding of the NEC mechanisms, and contracts generally, makes GVE the right partner for difficult and complex commercial issues.

Fayat has been working closely with GVE for a number of years and has always found their services very effective and professional. We have always appreciated the availability and time taken to understand our business expectations, limitations and strategies.

GVE has provided services to Fayat from their introduction to the UK market and throughout our major projects. This has included the training of our site management and senior international management team in NEC practice with material provided in both English and French.

During the construction phase of our most complex UK project GVE has provided day-to-day site assistance with early warnings, programme submissions, compensation events and formal communications to both our client and a number of subcontractors ensuring a fully NEC compliant operation.

When it comes to dispute resolution, GVE has been able to propose, put together and be a material part of a professional team of experienced construction lawyers, commercial specialists, expert planners and technical experts to prepare Fayat Piling to serve legal proceedings. The strong commercial and legal team made it possible to get through difficult commercial negotiations and resolve complex contractual matters whilst eventually avoiding adjudication and court claim procedures.

GVE is able to provide the right level of staff competence, tailored from director through to more junior QS levels and planners, as and when we needed them.

GVE strikes the right balance of being both a support and a guide throughout a projects' lifespan. We would not hesitate to recommend GVE.

Yours sincerely,

François Xavier Bailly
Country Manager, Fayat Piling Ltd
